

Sippy Downs Drive Upgrade

Stage 4

Project number: P-B4250

Night works – University Way and Sippy Downs Drive intersection Sunday 7 April to Thursday 18 April, 6pm – 6am (weather permitting)

Major construction works - preparation for new intersection

As part of the Sippy Downs Drive Upgrade project, road and services works are required to prepare for construction of the new signalised intersection at University Way and Sippy Downs Drive. Please refer to the map on page 2 of this notification for further details.

Due to the high traffic volumes at this intersection during the day these works must be undertaken at night. This timing will help to minimise inconvenience to the community.

Construction works include the:

- removal of the existing roundabout and traffic islands
- installation of a temporary roundabout (until the new intersection is constructed)
- removal of existing street light poles and other electrical infrastructure
- installation of temporary street lights (until the new intersection is constructed)
- laying of new asphalt (bitumen) on the road surface
- temporary line marking

Dates and times of works

Sunday 7 April – Thursday 18 April, 6pm – 6am

What to expect during construction

Council will make every effort to minimise impacts to motorists and the local community during construction. However, throughout the construction period there will be:

- changed traffic conditions – reduced speed limits, temporary lane closures, traffic realignments, traffic control
- construction noise - including the operation of machinery and tools
- increased heavy vehicle movements complete with reversing beepers
- night lighting for construction teams
- asphalt (bitumen) works

We would like to request that motorists travelling throughout the Sippy Downs area on these nights allow a few extra minutes in travel time to reach their destination.

The project team will continue to liaise with directly affected residents to inform them of specific construction activities, timeframes and impacts.
