

Sippy Downs Drive Upgrade

Stage 4

Project number: P-B4250

REVISED Stormwater upgrade works

Driveway areas, T & G Sand & Gravel, 5 Sippy Downs Drive
2 - 5 June. Night works 5pm – 12 midnight (weather permitting)
6 June. Day works 6am – 6pm (weather permitting)

Revised dates and times due to recent rain

As part of the Sippy Downs Drive Upgrade works stormwater upgrades are taking place. This work involves the digging of large trenches to accommodate and lay new stormwater pipes and reinstatement of the areas.

In order to undertake this work, temporary demolition and reinstatement of some driveways is required. This will enable the stormwater pipes to be installed and ensure that the new driveways meet the new road levels.

To minimise impacts to businesses and residents, construction work crossing driveways will be undertaken as night works, from Monday 2 June - Wednesday 5 June from 5:00pm – 12 midnight (weather permitting).

On Thursday 6 June, standard daytime construction works will continue in this area from 6am – 6pm under traffic control.

After the stormwater pipes are installed, all driveways will be temporarily reinstated until new, permanent concrete driveways can be constructed.

T & G Sand & Gravel will remain OPEN for business as usual throughout ongoing construction works.

What to expect during construction

Intermittent, medium level construction noise is to be expected including the operation of machinery and large vehicle movements.

For safety reasons, during night works, night lighting will be in place.

Traffic control will be utilised where required.

The project team will try to minimise construction impacts wherever safe and practical to do so.

We thank the community for your co-operation and understanding as we deliver this important upgrade to Sippy Downs Drive.

Please refer to the map on page 2 for more details of these works.
